Charter of the Student in Need of a Special Statute (EBS)

The present charter defines the general framework of relations between the student and the University.

By benefitting from a recognition of the special status "EBS", the student will benefit from a particular status, as set out in the general regulations of the ULB.

The commission having attributed the status "EBS" will do everything to accompany the student as much as possible, both from an academic point of view and from a medical, sports, artistic or social point of view.

As a result, the student is committed to do everything to respect the plan of accompaniment defined by the EBS/ESH, EBS/ESHN, EBS/EAHN commissions.

During the academic adjustments (absence, modification of exam date, etc.), the student is required to respect the general rules and the deadlines fixed in particular as well as to prove his loyalty towards his academic tutors, members of the commission and other students.

The student is committed to keep the commission regularly informed of his study project, to alert at time when adaptations must be thought and put in place and to respect the adjustments and the aids which are put in place.

Any failure on the part of the obligations or execution of good faith of the present convention can lead to the annulment of this contract.

This charter is signed for the duration of validity of the "EBS" status granted, which is at most for an academic year.

The request for renewal must be made each academic year.
