MASTER THESES THEMATIC FIELDS 2015-2016

1. Design and application of an integrated supply chain or transport performance assessment model.

2. Développement d’un modèleassocié à la plateforme URBWISE de communication et de gestion pour une logistique urbaine intelligente.

3. Design of innovative (or assessment of) supply chain solutions for the hospital/healthcare or agribusiness/food supply chains.

4. Design and application of a maturity matrix model dedicated to smart city and smart mobility applications.

- Subjects will belong to one of these thematic fields.
- You can propose a subject within these thematic fields. A proposed by yourselves subject which does not belong to one of the 4 thematic fields will be approved if interesting enough and compatible with guidance resources offered by the unit Qalinca-Labs.
