

## CURRICULUM VITAE SUMMARY

Name : SWILLENS

First Name : Stéphane

Office Address:

IRIBHM

Faculté de Médecine - ULB

Campus Erasme CP602

route de Lennik, 808

B 1070 Bruxelles

Belgium

Date and place of birth : April 11th, 1951, Etterbeek

Nationality: belgian

University studies (Université Libre de Bruxelles):

1973: Licence en Sciences Physiques (MS)

1973: Agrégation de l'Enseignement Secondaire Supérieur pour les Sciences Physiques

1978: Doctorat en Sciences (PhD)

("Simulation of the cyclic AMP-mediated hormonal regulation")

Fellowships and positions:

10/1973 - 9/1976 : supported by IRSIA

3/1977 - 9/1982 : researcher, supported by a "Actions Concertées" contract

10/1982 - : researcher ULB

10/1992 - : lecturer at ULB Medical School

Teaching activities:

Physics (1<sup>er</sup> baccalauréat polyvalent en Médecine, ULB)

Biophysics and introduction to informatics (2<sup>ème</sup> candidature en Médecine, ULB)

Molecular pharmacology (2<sup>ème</sup> licence en Sciences Biomédicales, ULB)

Selected bibliography

- Protein Kinase and Cyclic 3':5' AMP : Significance of Binding and Activation Constants. S. Swillens, E. Van Cauwer & J.E. Dumont (1974) Biochim. Biophys. Acta 364, 250-259

- Consequences of the Intracellular Distribution of Cyclic 3':5'-Nucleotide Phosphodiesterases. S. Swillens, M. Paiva & J.E. Dumont (1974) FEBS Letters 49, 92-95

- A Pitfall in the Interpretation of Data on Ligand-Protein Interaction. S. Swillens & J.E. Dumont (1975) Biochem. J. 149, 779-782

- Kinetics of Adenosine 3':5'-Monophosphate Accumulation in Dog Thyroid Slices. S. Swillens, J. Van Sande, R. Pochet, D. Delbeke, M. Piccart, M. Paiva & J.E. Dumont (1976) Eur. J. Biochem. 62, 87-93

- Slow GDP Dissociation from the Guanyl Nucleotide Binding Site of Turkey Erythrocyte

Membranes as the Limiting Step in the Activation of Adenylate Cyclase by  $\beta$ -Adrenergic Agonists. S. Swillens, M. Juvent & J.E. Dumont (1979) FEBS Letters 108, 365-368

- Consequences of Hormone-Induced Desensitization of Adenylate Cyclase in Intact cells. S. Swillens, E. Lefort, R. Barber, R.W. Butcher & J.E. Dumont (1980) Biochem. J. 188, 169-174

- A Unifying Model of Current Concepts and Data on Adenylate Cyclase Activation by  $\beta$ -Adrenergic Agonists. S. Swillens & J.E. Dumont (1980) Life Sciences 27, 1013-1028

- Non-linear Coupling between Receptor Occupancy and Biological Effect as a Requirement for a higher Drug Efficacy. S. Swillens & J.E. Dumont (1980) Mol. Cell. Endocrinol. 20, 233-242

- A Pitfall in the Interpretation of Data on Adenylate Cyclase Inactivation by Irradiation. S. Swillens & J.E. Dumont (1981) FEBS Letters 134, 29-31

- Size Determination of an Equilibrium Enzymic System by Radiation Inactivation. Theoretical Considerations. P. Simon, S. Swillens & J.E. Dumont (1982) Biochem. J. 205, 477-483

- Modulation of Catecholamine Activation of Adenylate Cyclase by the Number of Active  $\beta$ -adrenergic Receptors : Theoretical Considerations on the Role of Receptor Diffusion in the Cell Membrane. S. Swillens (1982) J. Cycl. Nucl. Res. 8, 71-82

- On the Interactions of Adenosine 3':5'-Monophosphate with the Components of Protein Kinase I. A Theoretical Equilibrium Analysis. S. Swillens (1983) Eur. J. Biochem. 137, 581-587

- Simulation of an Inhibitory Equilibrium System. Aberrant Proteinic Target Sizes as Obtained by Radiation Inactivation. S. Swillens (1984) Biochem. J. 222, 273-276

- Presence of Hormonogenic and Repetitive Domains in the First 930 Amino Acids of Bovine Thyroglobulin as Deduced from the cDNA Sequence. L. Mercken, M.-J. Simons, G. De Martynoff, S. Swillens & G. Vassart (1985) Eur. J. Biochem. 147, 59-64

- Muscarinic Cholinergic Receptors Study in Pancreatic Acinar Carcinoma of Rat. G. Taton, M. Delhaye, S. Swillens, J. Morisset, L. Larose, D.S. Longnecker & G.G. Poirier (1985) Int. J. Cancer 35, 493-497

- Primary Structure of Bovine Thyroglobulin as Deduced from the Sequencing of its 8431 Base cDNA. L. Mercken, M.-J. Simons, S. Swillens, M. Massaer & G. Vassart (1985) Nature 316, 647-651

- Inactivation of Macromolecules by Ionizing Radiation : Deterministic Single Hit or Stochastic Multievent Process ? S. Swillens (1986) Biochem. J. 233, 655-659

- Allosteric Modulation of [ $^3$ H]Nitrendipine Binding to Cardiac and Cerebral Cortex Membranes by Amiodarone. P. Nokin, M. Clinet, S. Swillens, C. Delisée, L. Meysmans & P. Chatelain (1986) J. Cardiovasc. Pharmacol. 8, 1051-1057

- The Escape of Cyclic AMP from Dog Thyroid Slices Exposed to Positive and Negative Regulators. P. Cochaux, J. Van Sande, S. Swillens & J.E. Dumont (1986) J. Cycl. Nucl. Prot. Phosph. Res. 11, 75-85

- Homology between Thyroglobulin and Acetylcholinesterase : an Explanation for the Pathogenesis of Grave's Ophthalmopathy ? M. Ludgate, S. Swillens, L. Mercken & G. Vassart (1986) *The Lancet* II, 219
- Analysis of Sequence and Structure Homologies between Thyroglobulin and Acetylcholinesterase: Possible Functional and Clinical Significance. S. Swillens, M. Ludgate, L. Mercken, J.E. Dumont & G. Vassart (1986) *Biochem. Biophys. Res. Commun.* 137, 142-148
- Complete Nucleotide Sequence of the Human Thyroperoxidase-Microsomal Antigen cDNA. F. Libert, J. Ruel, M. Ludgate, S. Swillens, N. Alexander, G. Vassart & C. Dinsart (1987) *Nucl. Ac. Res.* 15, 6735
- Genetic Linkage between the Bovine Protease Inhibitor 2 (Pi-2) and S Blood Group Loci. M. Georges, S. Swillens, Y. Bouquet, A.S. Lequarré & R. Hanset (1987) *Animal Gen.* 18, 311-316
- Thyroperoxidase, an Auto-Antigen with a Mosaic Structure Made of Nuclear and Mitochondrial Gene Modules. F. Libert, J. Ruel, M. Ludgate, S. Swillens, N. Alexander, G. Vassart & C. Dinsart (1987) *EMBO J.* 6, 4193-4196
- The Human Pregnancy-Specific  $\beta$ 1-Glycoprotein (PS $\beta$ G) and the Carcinoembryonic Antigen (CEA)-Related Proteins Are Members of the Same Multigene Family. C. Streydio, K. Lacka, S. Swillens & G. Vassart (1988) *Biochem. Biophys. Res. Commun.* 154, 130-137
- Cloning and Sequencing of a Calcium-Binding Protein Regulated by Cyclic-AMP in the Thyroid. A. Lefort, R. Lecocq, F. Libert, F. Lamy, S. Swillens, G. Vassart & J.E. Dumont (1989) *EMBO J.* 8, 111-116
- Characterization of the Interaction Constants for the Binding of two Unlabelled Ligands to two Sites of a Receptor : an Experimental Strategy. S. Swillens, A. Gourdin & O. Delahaut (1989) *Naunyn-Schmiedeberg's Arch. Pharmacol.* 339, 487-495
- A Pitfall in the Computer-Aided Quantitation of Autoradiograms. S. Swillens, P. Cochaux & R. Lecocq (1989) *Trends Biochem. Sci.* 14, 440-441
- On the Use of DNA Fingerprints for Linkage Studies in Cattle. M. Georges, M. Lathrop, P. Hilbert, A. Marcotte, A. Schwers, S. Swillens, G. Vassart & R. Hanset (1990) *Genomics* 6, 461-474
- Structure, Evolution and Chromosomal Localization of the Human Pregnancy-Specific  $\beta$ 1 Glycoprotein Gene Family. C. Streydio, S. Swillens, M. Georges, C. Szpirer & G. Vassart (1990) *Genomics* 6, 579-592
- Computer Simulation of a Cytosolic Calcium Oscillator. S. Swillens & D. Mercan (1990) *Biochem. J.* 271, 835-838
- Studies with Recombinant Autoepitopes of Thyroid Peroxidase: Evidence suggesting an Epitope Shared between the Thyroid and the Gastric Parietal Cell. R. Elisei, S. Mariotti, S. Swillens, G. Vassart & M. Ludgate (1990) *Autoimmunity* 8, 65-70

- Dynamic Control of Inositol 1,4,5-Trisphosphate-Induced Ca<sup>2+</sup> Release: a Theoretical Explanation for the Quantal Release of Ca<sup>2+</sup>. S. Swillens (1992) *Mol. Pharmacol.* 41, 110-114
- How to Estimate the Total Receptor Concentration when the Specific Radioactivity of the Ligand is Unknown. S. Swillens (1992) *Trends Pharmacol. Sci.* 13, 430-434
- Highly sensitive control of transcriptional activity by factor heterodimerisation. S. Swillens & I. Pirson (1994) *Biochem. J.* 301, 9-12
- Transient inositol 1,4,5-trisphosphate-induced Ca<sup>2+</sup> release: a model based on regulatory Ca<sup>2+</sup>-binding sites along the permeation pathway. S. Swillens, L. Combettes & P. Champeil (1994) *Proc. Natl Acad. Sci. USA* 91, 10074-10078
- Rapid filtration studies of the effect of cytosolic Ca<sup>2+</sup> on inositol 1,4,5-trisphosphate-induced <sup>45</sup>Ca<sup>2+</sup> release from cerebellar microsomes. L. Combettes, Z. Hannaert-Merah, J.F. Coquil, C. Rousseau, M. Claret, S. Swillens & P. Champeil (1994) *J. Biol. Chem.* 269, 17561-17571
- Interpretation of Binding Curves Obtained with High Receptor Concentrations: A Practical Aid for Computer Analysis. S. Swillens (1995) *Mol. Pharmacol.* 47, 1197-1203
- Does a radiolabelled ligand bind to a homogeneous population of non-interacting receptor sites? S. Swillens, M. Waelbroeck & P. Champeil (1995) *Trends Pharmacol. Sci.* 16, 151-155
- Characterization of the co-agonist effects of strontium and calcium on myo-inositol trisphosphate-dependent ion fluxes in cerebellar microsomes. Z. Hannaert-Merah, L. Combettes, J.F. Coquil, S. Swillens, J.P. Mauger, M. Claret and P. Champeil (1995) *Cell Calcium* 18, 390-399
- Evidence that most high affinity ATP binding sites on aortic endothelial cells and membranes do not correspond to P2 receptors. S. Motte, S. Swillens & J.M. Boeynaems (1996) *Eur. J. Pharmacol.* 307, 201-209.
- Quantal release, incremental detection, and long-period Ca<sup>2+</sup> oscillations in a model based on regulatory Ca<sup>2+</sup>-binding sites along the permeation pathway. G. Dupont & S. Swillens (1996) *Biophys. J.* 71, 1714-1722.
- Stochastic simulation of a single inositol 1,4,5-trisphosphate-sensitive Ca<sup>2+</sup> channel reveals repetitive openings during 'blip-like' Ca<sup>2+</sup> transients. S. Swillens, P. Champeil, L. Combettes & G. Dupont (1998) *Cell Calcium* 23, 291-302.
- Effect of protein kinase A-induced phosphorylation on the gating mechanism of the brain Na<sup>+</sup> channel: model fitting to whole-cell current traces. P. d'Alcantara, S. Schiffmann & S. Swillens (1999) *Biophys. J.* 77, 204-216
- From calcium blips to calcium puffs: theoretical analysis of the requirements for inter-channel communication. S. Swillens, G. Dupont, L. Combettes & P. Champeil (1999) *Proc. Natl Acad. Sci. USA* 96, 13750-13755

- Mechanism of receptor-oriented intercellular calcium waves propagation in hepatocytes G. Dupont, T. Tordjmann, C. Clair, S. Swillens, M. Claret & L. Combettes (2000) *FASEB J.* 14, 279-289
- Inactivation of adenosine A<sub>2A</sub> receptor impairs long term potentiation in the accumbens nucleus without altering basal synaptic transmission P. d'Alcantara, C. Ledent, S. Swillens & S. N. Schiffmann (2001) *Neuroscience* 107, 455-464
- Reduced transition between open and inactivated channel states underlies 5HT increased I(Na<sup>+</sup>) in rat nociceptors. P. d'Alcantara, L.M Cardenas, S. Swillens & R.S. Scroggs (2002) *Biophys J.* 83, 5-21
- Ca<sup>2+</sup> oscillations in hepatocytes do not require the modulation of InsP<sub>3</sub> 3-kinase activity by Ca<sup>2+</sup> G. Dupont, O. Koukoui, C. Clair, C. Erneux, S. Swillens & L. Combettes (2003) *FEBS Letters* 534, 101-105
- Bidirectional synaptic plasticity as a consequence of interdependent Ca<sup>2+</sup>-controlled phosphorylation and dephosphorylation pathways. P. d'Alcantara, S. N. Schiffmann & S. Swillens (2003) *Eur. J. Neurosci.* 17, 2521-2528
- Kinetics of TSH and TSA<sub>1</sub> binding and action on the TSH receptor in intact CHO-TSHR cells. J. Van Sande, M. J. Costa, C. Massart, S. Swillens, S. Costagliola, J. Orgiazzi & J. E. Dumont (2003) *J. Clin. Endocrinol. Metab.* 88, 5366-5374
- A<sub>2A</sub> receptor and striatal cellular functions: regulation of gene expression, currents, and synaptic transmission. S. N. Schiffmann, D. Dassel, P. d'Alcantara, C. Ledent, S. Swillens & M. Zoli (2003) *Neurology.* 61, S24-29
- Instant evaluation of the absolute initial number of cDNA copies from a single real-time PCR curve. S. Swillens, J.-C. Goffard, Y. Maréchal, A. de Kerchove d'Exaerde & H. El Housni (2004) *Nucleic Acids Res.* 32, e56
