

# Sensitivity amplification in biochemical systems

A. GOLDBETER† AND D. E. KOSHLAND, JR

Department of Biochemistry, University of California, Berkeley,  
California 94720, USA

---

I. INTRODUCTION	556
<i>Definition of terms</i>	557
II. RESULTS	558
(A) <i>Sensitivity amplification in co-operative and Michaelian enzymes</i>	558
<i>Link between <math>A_S</math> and <math>R_S</math></i>	562
<i>Comparison with differential expression for co-operative enzymes</i>	562
(B) <i>Amplification by enzymes subjected to covalent modification</i>	562
<i>Amplification in terms of change in the ratio of modification rates</i>	564
<i>Amplification factor <math>A_{II}</math> related to change in effector level</i>	569
<i>Total amplification factor (<math>A_S</math>) for covalent modification scheme</i>	570
<i>Propagation of sensitivity amplification in multicyclic cascades</i>	573
(C) <i>Sensitivity amplification in substrate cycles</i>	581
(D) <i>Sensitivity amplification in multiple steady-state transitions</i>	581
(E) <i>Amplification in time-dependent processes</i>	584
III. CONCLUSIONS	585
